

SMT-AP

SMT-AP Pte. Ltd. in Singapore

On 06.08.2009 the specialist for thermal process from Wertheim, Germany, opened a new branch "SMT-AP Pte. Ltd." in Singapore. Mr. Daniel Schneider, branch manager in Singapore, has a great deal of specific market experience and is an absolute specialist for customer applications. Not only the sales of the SMT product range that include a Full Service program fall under his management, our corporate philosophy has also been transferred. In other words, environmental awareness has become a major issue, an awareness that is reflected in SMT systems by low, resource-saving consumption, minimal maintenance requirements and a particularly high rate of energy efficiency.

Mr. Daniel Schneider

As it is the case in Germany, all SMT equipment and know-how is at the disposal of every Asian customer or interested party in a Competence Centre where new products, new developments or improvements can undergo extensive practical testing. Of course it is not possible to manage the enormous distances in the Asia-Pacific-Area from just one central point. For the necessary proximity to customers we are continuing with our long-standing sales- and service partner as our representative Dou Yee with its comprehensive network of sales- and service points at the strategic important sites.
